

Jack F. Sanders Health Care Center Long-Term Care

Residents requiring 24-hour skilled nursing care are welcome at the Jack F. Sanders Health Care Center. Our highly rated skilled nursing facility offers outstanding medical care in a warm, caring environment. The center features both private and semi-private rooms, and residents enjoy amenities such as private telephones, flat-screen tv, and many recreational activities.

Respite Care

Our respite care program provides a compassionate and personalized short-term solution to alleviating the stress and possible burnout common to the daily support of caring for a loved one. We know that no one can take care of your loved one like you, but you can rely on us to offer total continuity of care in a safe, restorative environment. Planned in advance for the benefit of the caregiver, Pathways offers respite care for a period of time from a minimum of 5 days and up to 30 days.

Hospice Care

In collaboration with those specialized in palliative care; the Pathways hospice program offers pain management, symptom control, and other medical services to the terminally ill or those in the late stages of chronic disease progression.

Specialized Memory Care

For individuals requiring memory care services beyond those available in our assisted living program, we have dedicated an entire unit in our Health Care Center to specialized memory care. In this safe and secure environment, residents participate in life enrichment programs designed especially for those with advanced memory loss.

Ventilator Dependent Care Assisted Breathing Unit

The goal of the Masonic Pathways Assisted Breathing program is to improve the quality of life for patients who are ventilator dependent by providing the least restrictive and most home-like environment possible.

Following an individually developed care plan, uniquely designed to assist patients in achieving their highest potential, most can attain a greater degree of independence, making a world of difference in their quality of life. For some, this could include total liberation from a ventilator.

Now, without leaving the state, more patients will be able to receive high quality care closer to home. Family and friends throughout Michigan will find it convenient to visit, participate with the care team during weekly rounding, and enjoy social interaction with their loved ones.
